

Drive Utilization Improvements at the Procedure Level with ProcedureProfiler.

Get below the surface to impact savings and quality of care.

Service Lines

01

Breaking Ground

Dig into spending by department, including breakouts of case counts and codes.

- Total supply cost by department
- Department case mix
- Case cost by physician

Procedure Costs

02

Digging Deeper

Drill into an individual procedure, by clinician, manufacturer, product classification, and location, over any time period.

- Procedure and patient demographics for each physician in your organization
- Supply cost variability and impact by product manufacturer
- Facility level imbalances in procedure cost

Product Use

03

Extracting Additional Potential

See utilization and savings opportunities bubble up. Pinpoint best practices in materials utilization and procedure protocols; identify and reduce variance in supply costs.

- Case cost and patient outcomes based upon product utilization
- New product introduction by physician
- Physician differences in OR time and patient length of stay
